

Our quality policy

For more than 47 years, the Fertility Control Clinic has been providing high quality sexual and reproductive health services. Today, we are recognised for helping to ensure our patients can access healthcare services in a safe and confidential manner, and free from threat and harassment.

Our vision is to sustain and strengthen our role as a leading provider of sexual and reproductive health services.

Our mission is to promote and assure accessible, high quality and safe health care services for all patients facing reproductive health choices whilst respecting their dignity, confidentiality and personal values.

This vision and mission are in essence a declaration of our role, function and promise to our patients, staff and the community. As we move forward and to build our future, we will align our priorities and directions with this agenda in mind.

Our promises

- To deliver safe and quality clinical services
- To improve our patients' experience
- To optimize access to our services
- To develop our workforce To build our future
- To build our future
- To strengthen our leadership, education, research and advocacy role
